

Faiz Ali

Web Developer / Front End Developer at work cloud technology

As a frontend developer with one year of experience, I am proficient in creating responsive and dynamic websites using modern web technologies such as HTML, CSS, JavaScript, and ReactJS. I have experience in developing and implementing user-friendly interfaces that improve the user experience and contribute to the overall success of the website. I am eager to learn new things and I am always looking for ways to improve my skills. I am also a quick learner and I am able to adapt to new environments quickly. I am confident that I can make a significant contribution to your team.

- Worked as a Cloud Technology Specialist, responsible for designing, implementing, and maintaining cloud-based solutions for clients.
- Collaborated with cross-functional teams to understand client requirements and provide technical expertise in cloud architecture and solutions.
- Utilized a wide range of technologies, including HTML, CSS, React, Redux, jQuery, and JavaScript, to develop scalable and responsive web applications.
- Designed and implemented cloud infrastructure using platforms ensuring high availability, security, and scalability of applications.
- Developed and optimized APIs for seamless integration of cloud services with external systems.
- Conducted thorough testing and debugging of cloud-based applications to ensure functionality and performance.
- Provided technical support to clients, troubleshooting issues and resolving technical challenges in a timely manner.
- Collaborated with the sales team to identify business opportunities and provide technical consultations during the pre-sales process.
- Kept up-to-date with the latest advancements in cloud technologies and best practices, continuously enhancing professional skills.

Typhone Tech,

Nov 2021 - Apr 2022 (5 months)

React JS Developer / Front End Developer

Lahore, Pakistan

- Developed websites from front to backend using JavaScript, and HTML.
- Implemented enhancements that improved web functionality and responsiveness.
- Designed and maintained both corporate and client websites.

Projects

Animation theme

May 2023 - Present (Recently joined)

<https://mrfaiz123.github.io/react-tailwind-template/>

Tools: Html,css,React,Javascript,Tailwind,Animation

The project I worked on involved creating a captivating animation-themed website using a combination of HTML, CSS, React, JavaScript, Tailwind, and Animation libraries. The main goal was to develop an engaging user interface and enhances the overall user experience.

Validation

Jan 2023 - Present (4 months)

Company: vwork cloud technology

<https://mrfaiz123.github.io/validation1/>

Tools: Html,css,React,Javascript,Tailwind

In this project, my focus was on creating a validation-themed website using HTML, CSS, React, JavaScript, and the Tailwind CSS framework. The main objective was to design and implement a user-friendly interface that emphasized data validation and user input feedback.

React App

Nov 2022 - Present (6 months)

Company: vwork cloud technology

<https://mrfaiz123.github.io/React-theme/>

Tools: Html,css,React,Tailwind,Routing

Routing

Company: vwork cloud technology

<https://mrfaiz123.github.io/react-router-template/#/>

Tools: Html,css,javascript,React

In this project, I worked on creating a routing-themed website using HTML, CSS, JavaScript, and the React library. The main objective was to build a website with multiple pages and seamless navigation between them, allowing users to explore different sections or features of the website easily.

Flexo

<https://mrfaiz123.github.io/HTML-CSS-template/>

Tools: Html and css

Flexo is a project where I developed a modern and flexible website template using HTML and CSS. The main focus was to create a versatile layout that can adapt to different types of content and provide a visually appealing experience for users.
